## SKILLS

- Backend Engineering
- API & System Architecture
- JavaScript (Node.js) & Go
- AI/ML Fundamentals
- Security Principles
- Analytical Problem Solving

## EDUCATION

Bachelor of Informatics
Gunadarma University
2023 - Present

## LANGUAGE

Indonesia
English

## EXPERIENCE

### AI/ML & BACKEND ENGINEER

Google
2023 - Present

- Design and deploy scalable backend services for AI-driven products
- Build data pipelines and model-serving infrastructure
- Optimize distributed systems for performance and reliability

### BACKEND ENGINEER

Microsoft
2020 - 2023

- Develop high-performance APIs and cloud-native services
- Architect microservices handling large-scale data processing
- Implement secure authentication and authorization systems

### MACHINE LEARNING ENGINEER

OpenAI
2017 - 2020

- Develop and optimize machine learning models for production
- Build backend infrastructure for AI model deployment
- Work on distributed training and inference systems
